GENERAL REQUIREMENTS

The above referenced property contains a holding tank for the disposal of sewage. This serves as an agreement, entered by and between an MPCA licensed Maintainer and the property to retain pumping services as needed as determined by the tank size and water usage.

The pumping of the holding tank shall occur on a regular basis to prevent wastes from discharging to the ground surface and/or backing up into the dwelling or other establishment. The owner is prohibited from pumping or otherwise draining or removing any of the tank contents themselves. Pumping can be scheduled at either intervals, or an as-needed basis with proper advance notice.

A copy of this agreement between shall be submitted to the University of Minnesota Building Code Department the regulating agency. The MPCA licensed pumper agrees to maintain the tank(s) and properly dispose of sewage wastes in accordance with Minnesota Rules 7080 and any other applicable regulations. Failure to maintain the holding tank(s) or failure to provide pumping receipts when required may result in enforcement action.

The owner shall be responsible for maintaining records of tank pumping and shall submit such records annually to the University of Minnesota Building Code Department to satisfy permit requirements.
